

Welcome... to Olive Goidhoo

Beautiful Baa Atoll...

Baa Atoll is located approximately 60 miles North west of Velana International Airport.

The Atoll is known for its globally significant biodiversity with its conservation of whale sharks, manta rays, soft corals and many other feeding and breeding grounds for a variety of fish.

Baa Atoll accommodates the world renowned Hanifaru Bay, popular site during Western Monsoon with an aggregate of Whale sharks and Manta rays for feeding. This site along with many other sites in Baa Atoll is declared as UNESCO protected area for its unique Biodiversity.

Goidhoo

Goidhoo Island lies 52 nautical miles from Velana International Airport, in a small separate atoll along with Fulhadhoo and Fehendhoo islands.

The Admiralty Chart describes this atoll as 'Horsburgh Atoll'. Unlike other atolls in the Maldives, this atoll has a lagoon that is uniquely free of coral heads in the center.

Goidhoo is surrounded by a large outer reef teeming with rich marine life, making it a beautiful spot for fishing and snorkeling. It is also surrounded by an inhabited island and 7 sandbanks.

The friendly people of Goidhoo make a living through farming and fishing. You will see hundreds of vegetable farms across the island.

Goidhoo is a relatively larger island with a population of just 783 people, and is known for its untouched and secured beaches and marine life. In Goidhoo one can experience the natural beauty of the Maldives with a feel for our own culture and unity.
